

Conveyor Belt Cleaner

Custom-built solutions for conveyor belt cleaning and sanitation.

The SteamPro Systems Advantage...

✓ Easily clean and disinfect conveyor belts of any size.

Maximize production efficiency and minimize cleaning costs using SteamPro Systems' top of the line conveyor belt steam cleaning systems. Our product is designed to sanitize flat plastic, vinyl, silicone or polyester belts during operation. This means no production downtime, better sanitation, no waiting, and above all, no time wasted.

✓ Build your own steam-powered conveyor belt cleaner.

SteamPro Systems conveyor belt cleaning systems are made of food-grade stainless steel. Powered by the SteamPro Industrial steam cleaner, our belt cleaning solution can use any type of vacuum to extract food residue, grease, oils, adhesives and more. They are completely custom-built according to your needs.

✓ Maximum steam production for total sanitation.

Operating at temperatures of up to 413°F/212°C and pressures of up to 12 bar/175 psi, the SteamPro Industrial produces a powerful dry steam able to clean, degrease, disinfect and sanitize all without the use of chemicals. With a 5% water content, superheated steam is the most efficient all-natural cleaning agent.

The SteamPro Systems Advantage...

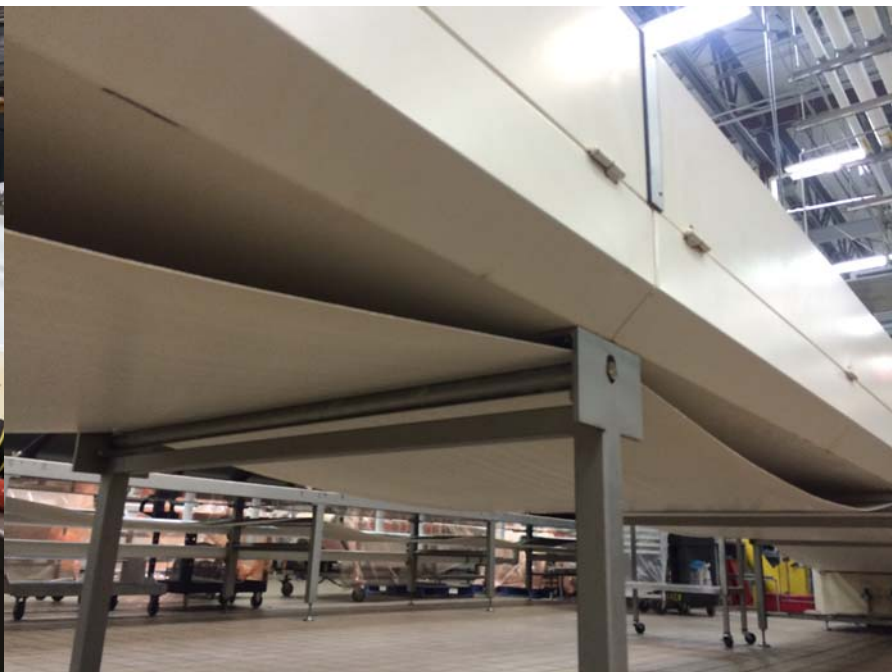

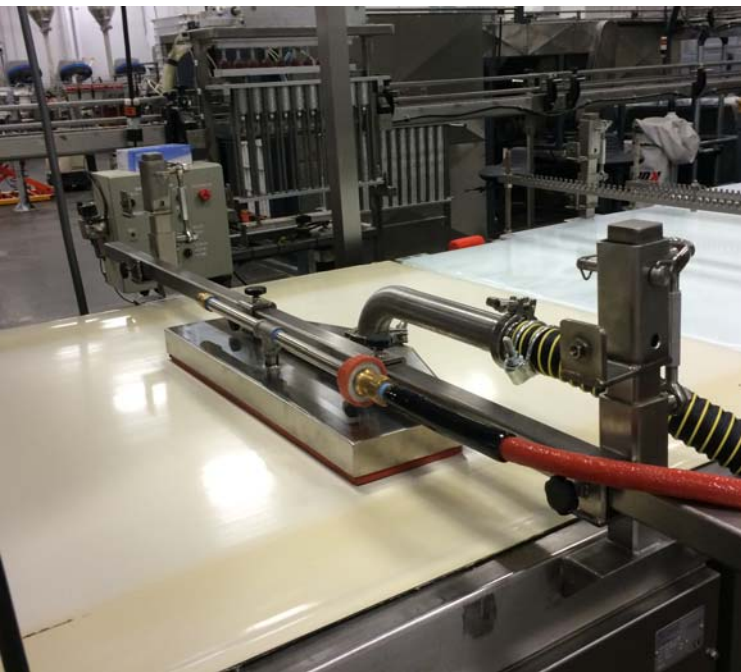

✓ Clean In Place (CIP) Options to Minimize Down Time and Maximize Cleaning Efficiency

With a Clean In Place conveyor belt system, we offer under mount conveyor heads customized to your belt size and specifications. This unique option allows you to leave the belt cleaning system in place and run the system either during the production run or during the sanitization shift.

✓ Integration with conveyor belt line to protect your conveyor belt

Our integration options give you peace of mind, ensuring the conveyor belt cleaner only operates when your conveyor belt is operational. We understand that conveyor belts themselves are a significant investment, with our product you are assured that it will only operate when the belt is operational thus not leaving steam contact with any part of the conveyor belt for an extended period of time.

The SteamPro Systems Advantage...

Benefits of SteamPro Conveyor Belt Cleaner are:

- ✓ CIP – Clean in Place technology. The ability to run the unit during your production run.
- ✓ Portable belt cleaner options for use in multiple locations and different belt sizes
- ✓ Belt sanitation units outperform other belt washing systems and manual belt cleaning
- ✓ Increase productivity by reducing product change-over times
- ✓ Clean more effectively by speeding cleaning tasks
- ✓ Reduce water consumption
- ✓ Reduce overall cleaning costs
- ✓ Ability to clean in environments that need to be kept dry.
- ✓ Sanitize conveyor belts without the use of chemicals
- ✓ Maximum steam production for total sanitation.
- ✓ Full conveyor line integration and customization options
- ✓ Integration with conveyor belt line to protect your conveyor belt
- ✓ Drastically reduce water consumption and waste water creation
- ✓ Completely customizable to fit your conveyor belts
- ✓ Consistently effective cleaning and sanitizing results
- ✓ Easily clean and disinfect conveyor belts of any size.
- ✓ Reduce chemical & disinfectant usage
